Finonyx Doc Simplifier

Transforming Document Management for Digital Banking

Banks deal with thousands of documents every day, customer forms, KYC records, loan files, agreements, signatures, and compliance papers. Handling these through paper-based or scattered digital systems leads to delays, data loss, audit risks, and operational inefficiency.

Finonyx Doc Simplifier is a digital document management solution designed for Oracle FLEXCUBE-based banks to move from manual paperwork to a secure, centralized, and automated document ecosystem. It enables easy upload, storage, tracking, and retrieval of documents from a single platform with full audit trails and regulatory compliance.

Why Doc Simplifier?

- Converts paper-heavy banking workflows into a digital, centralized repository
- Directly integrates with Oracle FLEXCUBE for document upload and viewing
- Provides API-based connectivity with CRM, eKYC, AML, and legacy systems
- Tracks document history with approvals, audit logs, and version control
- Enhances speed, compliance, and customer satisfaction with secure automation

Key Features

Centralized Digital Repository
Stores, organizes, and retrieves customer and transaction-related documents securely from a single platform.

Seamless FLEXCUBE Integration
Allows users to upload and view documents directly from Oracle FLEXCUBE screens no system switching required.

API-Based System Connectivity
Integrates easily with CRMs, eKYC, AML, credit bureaus, and third-party systems through secure APIs.

Smart Upload & Document Tracking
Supports digital upload with metadata, approval history, version control, and complete audit records.

Advanced Search & Quick Retrieval
Search documents using customer ID, account number, document type, or reference number within seconds.

Audit Trail & Compliance Management
Automatically records every document action - upload, view, modify, or approve ensuring regulatory adherence.

Real-Time Dashboards
Offers dashboards for RMs and back-office users to monitor document status, pending approvals, and turnaround times.

Secure Microservice-Based Architecture
Built on scalable microservices with encryption, role-based access, and support for on-premise, cloud, or hybrid deployment.

Technical Highlights

Component	Details
Technology Stack	Microservices, Java, REST APIs, Docker/Kubernetes
Integrations	Oracle FLEXCUBE, ISO 20022/8583, REST/SOAP APIs, MQ, SFTP
Security	Role-based access, encryption at rest & transit, ISO 27001:2022
Deployment Models	On-premises, Private Cloud, Hybrid
Scalability	Supports multi-branch, multi-region, and high document volume environments

Business Impact

Faster Document Processing

Reduces document upload, approval, and access time from days to minutes speeding up customer service and operations.

Reduced Operational Costs

Cuts expenses related to printing, paper files, storage, courier movement, and manual handling.

Stronger Compliance & Audit Readiness

Ensures every document is securely stored with traceable actions and time-stamped audit logs.

Higher Productivity

Automated document workflows save employee time, reduce manual tracking, and enhance efficiency across branches.

Better Customer Experience

Faster approvals, instant document access, and digital-first processing improve satisfaction and trust.

Scalable for Future Growth

Supports growing document volumes without additional infrastructure or manpower.

Effortless, Secure & Smart Document Management with Finonyx Doc Simplifier

Finonyx Doc Simplifier transforms document handling into a digital, compliant, and scalable system, empowering banks to work faster, smarter, and more securely.

Partner with Finonyx

Join hands with a partner that understands banking inside out. Finonyx combines deep domain expertise with future-ready solutions like Doc Simplifier to power your digital transformation journey.
